PROFESSIONAL SUMMARY

Full-Stack Software Engineer with **8+ years** of experience building **SaaS, CRM, ERP** and enterprise web applications. Strong hands-on background in **C#, ASP.NET Core, React, Next.js, PostgreSQL, Supabase**, REST APIs, database design, multi-tenant systems, authentication, cloud deployment and **CI/CD**.

Experienced in designing production-oriented business applications, integrating third-party services, working across backend and frontend layers, and collaborating with international clients and cross-functional engineering teams. Currently focused on modern **React/Next.js, TypeScript, PostgreSQL/Supabase** and **AI/LLM-enabled SaaS** applications while leveraging a strong .NET engineering foundation.

CORE TECHNICAL SKILLS

- **Languages:** C# | TypeScript | JavaScript | SQL | PHP | Dart
- **Frontend:** React | Next.js | TypeScript | HTML5 | CSS3 | Tailwind CSS | Bootstrap | jQuery | Razor
- **Backend & APIs:** ASP.NET Core | ASP.NET MVC | REST APIs | CQRS | MediatR | Dapper | .Net Boilerplate
- **Database:** PostgreSQL | Supabase | Neon PostgreSQL | Microsoft SQL Server | MySQL | SQLite | MongoDB
- **Architecture & Design:** Clean Architecture | Modular Monolith | Microservices | N-Tier | DDD | SOLID | Multi-Tenancy | RBAC | TDD | Layered Architecture
- **Cloud & DevOps:** Docker | Git | GitHub | GitHub Actions | CI/CD | Vercel | Render | Cloudflare | AWS | Azure | Oracle Cloud (OCI) | Redis | RabbitMQ | Distributed Caching
- **AI & Integrations:** AI/LLM APIs | RAG | Embeddings | Vector Search | OAuth/Google SSO | Supabase Auth | Webhooks | Third-Party APIs
- **Networking & Security:** MikroTik API & RADIUS | Palo Alto | pfSense | VPN | Turnstile | ReCaptcha
- **Real-Time & Communication:** SignalR | WebRTC | Firebase Cloud Messaging (FCM) | Supabase Realtime
- **Testing & Engineering:** xUnit | TestContainers | Postman | Swagger/OpenAPI | OpenTelemetry | Sentry | Grafana | Zabbix | Agile/Scrum | Waterfall | Code Review | Documentation | Mentoring | Trello/Slack

PROFESSIONAL EXPERIENCE

Lead Software Engineer

Metro Solution Limited

December, 2024 – Present

Shyamoli, Dhaka [Hybrid]

- Lead cross-functional engineering teams in designing & delivering scalable applications with SaaS system.
- Own software architecture, DB design, API development, code review, technical planning & projects delivery.
- Integrate backend and frontend applications using C#, ASP.NET Core, REST APIs, PostgreSQL/MySQL and modern web technologies.
- Work with international clients/stakeholders on requirements, technical solutions, code reviews, debugging, production support and developer mentoring.

Software Engineering Manager

SoftifyBD Limited

November, 2018 – April, 2024

Bandar, Narayanganj [On-Site]

- Led development teams delivering scalable CRM, ERP, Inventory, HR & business applications for globe.
- Designed system architectures, relational databases, REST APIs and multi-tenant business solutions using ASP.NET Core, SQL Server, MySQL and PostgreSQL.
- Managed technical planning, client communication, code quality, documentation, mentoring and production delivery across multiple business domains.

- Developed enterprise applications with ASP.NET Core MVC, SQL, KendoUI including RAMSApp for Int. client.
- Contributed to payment gateway integration, server maintenance, debugging & production issue resolution.

- Developed responsive web interfaces, DB solutions & analytics dashboards using HTML, CSS, JS/jQuery, Laravel & MySQL including project requirements analysis, project management and manuals creation.

EDUCATION

Bachelor of Science in Computer Science and Software Engineering (B.Sc. in CSSE)
American International University – Bangladesh (AIUB) | 2013 – 2017 | CGPA: 3.21/4.0

SELECTED KEY PROJECTS

FinTracker AI-Assisted Finance & Business SaaS - Designed and developed a production-oriented finance/business SaaS with tenant-aware workflows, transactions, cashbooks, budgeting, reporting and secure file management. - Integrated Google SSO, Cloudflare Turnstile/R2, cloud deploy & controlled AI/LLM-assisted business functionality.	Supabase PostgreSQL ASP.NET Core MVC REST APIs Cloudflare/R2 Google SSO CI/CD Render
Tasker24 Multi-Sided Service Marketplace Platform - Developing a multi-sided marketplace with responsive React/Next.js interfaces, reusable components, role-based workflows and user-specific dashboards. - Designed PostgreSQL-backed API integration and separate Web/API deployment workflows.	Next.js React TypeScript Tailwind CSS PostgreSQL/Neon REST APIs Docker Vercel OCI
StockDigital Modular Inventory & Business Management SaaS - Developed modular SaaS platform with multi-tenant architecture, relational modelling, migrations and RBAC workflows. - Implemented separate Web/API boundaries with Docker, Git/GitHub and CI/CD deployment.	ASP.NET Core PostgreSQL/Neon React REST APIs Docker CI/CD Render Vercel Bootstrap
ISP Digital ISP Business Automation CRM & SaaS Platform Developed ISP automation CRM with subscriber/service management, real-time communication and MikroTik RouterOS API integration using an N-Tier monolithic architecture.	ASP.NET MVC5 MSSQL SignalR MikroTik RouterOS API Multi-Tenancy Web APIs Webhooks PGW
MetroCRMPro Omnichannel Modular Based CRM Platform Developed a multi-industry CRM platform covering customer management, communication and business workflows, with REST APIs and cross-platform mobile integration.	React ASP.NET Core 8 MySQL MVC REST APIs Onion Architecture SignalR Many 3 rd Party Services
Biznify ERP & Business Management SaaS Oriented Platform Worked on a scalable ERP covering CRM, accounting, inventory, eCommerce and manufacturing with Clean Architecture-based service/API design.	Angular TypeScript ASP.NET Core 5 MySQL REST APIs Clean Architecture Microservices RabbitMQ
RAMS-APP (UK) Risk Assesment & Safety Management Platform Developed a cloud-based risk assessment and safety management application for FactionHealth, including Azure storage and Stripe payment integration.	AngularJS ASP.NET Core MSSQL Azure Blob Storage Stripe Kendo UI Store Procedures TDD Architecture

CERTIFICATIONS & PUBLICATION

- "Big Data(Data Analyst)" conducted by the AIUB under the LICT project of ICT Division in Dhaka, 2017.
- "Web Application Development- Dot Net" conducted by the BASIS-BITM under SEIP Project, Batch#23, 2016
- "Techniques for Converting Big Data from SQL to NoSQL Databases" Published in Academia.edu, July 2016.
